AEROMIX announces partnership with Independent Quality Observer

AEROMIX announces partnership with Independent Quality Observer. This partnership will help assure AEROMIX customers of excellent product and design quality while saving customers the time and cost of field inspections or hiring their own quality control staff.

The Independent Quality Observer provides special AEROMIX customers with 3 detailed and comprehensive written quality audits including photographs and a list of any corrective action required. The first audit is performed when all major components arrive at the start of manufacturing checking compliance of each component against customer specifications and technical submittals. The second audit occurs during manufacturing to inspect compliance with USA quality standards for fabrication, welding, electrical assembly, and piping. A third quality audit is conducted upon testing of equipment prior to shipment.

AEROMIX is a world leader in water and wastewater treatment equipment. AEROMIX designs and manufactures Compact Water Treatment Plants, Packaged Wastewater Treatment Plants, aerators, and mixers.

Contact Melauna Estrada for more information on our water and wastewater treatment equipment.
