AEROMIX Announces Shipment of 1.4 mgd Water Treatment System

In November of 2007, AEROMIX Systems, Inc. was awarded a large water treatment project for Camp Bucca in Iraq. We are happy to announce the recent shipment of that equipment. Installation and start-up will commence soon. The potable water treatment plant is a part of a \$110 million dollar expansion project that will increase the capacity of detainees at the Camp Bucca compound by 10,000. The AEROMIX compact water treatment system is completely self contained, pre-plumbed, pre-wired and tested. The system will draw well water locally and produce safe drinking water.

This project was preceded by other water treatment projects awarded to AEROMIX in Iraq, including aerators for the Diwanyiah and Hilla wastewater treatment plants just south of Baghdad.

AEROMIX is a world leader in water and wastewater treatment equipment. We look forward to continuing to support you with thorough and competitive proposals on all of our products as we enter our 21st year in business.
