U.S.A.

I wish to take a little bit of my time to thank you for your precious help. The results from our pilot SBR have been very satisfying so far and it is in big part due to your wise advice on blower and diffuser selection.

We are a very small privately-owned wastewater treatment plant facility. Suppliers in the field usually tend to bigger municipal or industrial projects and do not have the time or the will to work on smaller projects, like the biological reactor we are currently setting up. Therefore your help was well appreciated and we are especially grateful for the time you took to evaluate our needs and answer our questions.

As you can see, I'm a very satisfied customer and am looking forward to do business with you in the future when the need arises.

Thanks again for all your help.

Sincerely,

Roggy Drouinaud, M. Sc.
