AEROMIX TORNADO Eco™ Qualifies for Energy Efficiency and Environmentally Innovative Stimulus Funding Projects

On February 17th, US President Barack Obama signed the American Recovery & Reinvestment Act (ARRA). The Recovery Act has designated 7.22 billion USD for projects and programs that the Environmental Protection Agency (EPA) is overseeing. More than 80% of that funding will go to Clean Water and Drinking Water State Revolving Funds (SRF).

The Act specifies that *“to the extent there are sufficient eligible project applications, not less than 20% of the funds provided for projects must be used for water or energy efficiency, green infrastructure, or other environmentally innovative activities...projects that demonstrate new/and or innovative approaches to managing water resources in a more sustainable way...”*

That’s where AEROMIX comes in. Our newest product, the TORNADO Eco™ is perfectly qualified for environmentally innovative SRF projects. How?

- 25% greater oxygen transfer than the conventional aerator
- Reduces CO2 emissions by 2,750 lbs a year
- 100% recyclable anywhere in the world
- Completely powered by solar or wind power
- Reduces greenhouse gas creation

AEROMIX is a world leader in water and wastewater treatment equipment. Contact Melauna Estrada for more information on our water and wastewater treatment equipment.
